## COVID-19 Update

Cartersville Pediatric Associates has instituted procedures to keep you and your children as safe as is possible during the pandemic. We are now mandating the following.

1. Our waiting rooms are closed so you must call us upon arrival in the parking lot and we will let you know when it is possible for you to enter.
2. Only 1 parent or guardian and the patient will be allowed to enter. Other children and caregivers must remain outside the building.
3. All children above age 2 and adults must be masked throughout the visit.
4. Temperature screening of the patient and adult will be done upon entry into our office.
5. Checkups will only be done in suite 105.
6. We clean every exam room after each use.

Please be patient with us because these procedures that have been implemented to keep you safe has slowed down the check-in process. We are working as fast as we can in a completely new and concerning environment.

**Please wear your mask in public, it saves lives.**
